

ABHILASH R

Data Scientist | Machine Learning

Bangalore, Karnataka | +91 8867384162 | ABHILASH.20241CSE0600@presidencyuniversity.in

PROFESSIONAL SUMMARY

Aspiring Data Scientist with hands-on experience in machine learning, data analysis, and business intelligence, backed by three internships and five end-to-end deployed projects. Skilled in Python, SQL, and the modern ML/MLOps stack (PyTorch, TensorFlow, scikit-learn, Docker, FastAPI). Proven ability to translate raw data into predictive models and dashboards that support business decisions. Seeking a full-time Data Scientist / ML role.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, PySpark

Machine Learning & Deep Learning: PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, Hugging Face, NLTK

Cloud & MLOps: AWS SageMaker, GCP Vertex AI, Docker, MLflow, FastAPI, CI/CD, REST APIs

Visualization & BI: Power BI, Tableau, Excel, Plotly, Matplotlib, Seaborn, Streamlit

Tools & Practices: Git, GitHub, Linux, Jupyter, VS Code, A/B Testing, Statistical Modeling, EDA

INTERNSHIP EXPERIENCE

Data Science & Analytics Intern — Learn Depth

2026

- Built and evaluated machine learning models as part of applied data science project work, strengthening industry-level workflow and problem-solving skills.

Data Science Intern — Future Interns

2026

- Applied data analysis and modeling techniques to real project datasets, gaining exposure to end-to-end data science pipelines.

Data Analysis Intern — IntenSpark

2026

- Performed data cleaning, exploratory analysis, and reporting to support data-driven decision-making.

PROJECTS

Movie Success Prediction & Sentiment Analysis Platform | Python, XGBoost, LightGBM, NLTK, FastAPI, React, PostgreSQL, Docker

- Built a full-stack ML platform combining regression models (Random Forest, XGBoost, LightGBM, Gradient Boosting) with NLP sentiment analysis (NLTK, VADER, TextBlob) to predict box office performance and analyze audience sentiment.
- Delivered secure authentication, CSV upload, interactive dashboards, and downloadable analytics reports in a production-ready deployment.

Food Waste Prediction | Python, Flask, scikit-learn, Seaborn, joblib

- Developed and deployed an AI-powered web app using a Random Forest regression model to predict meal prep needs from weather/demand inputs, helping restaurants reduce food waste end-to-end.

Course Purchase Prediction | Python, Flask, scikit-learn, Pandas, HTML/CSS

- Built a Random Forest classifier with a Flask backend and HTML/CSS interface to predict student course purchase likelihood from age, study hours, and engagement, achieving strong accuracy.

Netflix Content Analysis | Python, Pandas, Matplotlib, Seaborn

- Conducted EDA on Netflix's content library, visualizing genre distribution, release trends, and content by country to uncover viewing patterns.

Smart City Guidance System | Java, JavaFX, Google Maps API

- Co-developed a desktop app helping travelers navigate major Indian cities with localized language support, categorized places/services, ratings, and Google Maps-based navigation.

CERTIFICATIONS

2025: Data Analytics Job Simulation — Deloitte

2026: Introduction to Data Science — Cisco Networking Academy | Machine Learning — Learn Depth | Data Science — Future Interns | Data Analysis — IntenSpark | Elevate Labs Certification

EDUCATION

B.Tech, Computer Science & Engineering — Presidency University, Bangalore

2024 – 2028
